PF-60 DOCUMENT FOLDER

Easy-to-use solution for folding applications

WE VALUE YOUR MAIL

PF-60

DOCUMENT FOLDER

ACCURATE, FLEXIBLE AND OPERATOR FRIENDLY

The Neopost PF-60 Document Folder is an easy-to-use solution for virtually all folding applications. Fast and dependable, it offers six popular, clearly marked folds for quick set-up and operation. Simply slide the fold stop to the desired fold, adjust stacker wheels, and go. Easy adjustments can be made to process a variety of precision folds.

There's no need to keep watch over this versatile folder. Load up to 500 sheets in the hopper; select pre-marked fold type, press the start button and walk away to attend to other important tasks. The PF-60 will quickly fold the documents and hold up to 500 finished pieces on its telescoping outfeed stacker until they are retrieved. The Daily Mail Mode feeder allows the PF-60 to fold up to four sheets – stapled or unstapled – in a single pass through the dedicated drop-in feed system. This system has its own self-centering side guides and skew adjustment to ensure that paper is loaded and feeds squarely into the folder.

The PF-60 can process paper up to 18" in length and 12.25" in width, giving it the flexibility to fold a variety of paper sizes. This ability to customize jobs allows operators to fold in virtually any configuration requiring two folds. Cross folding adds to the PF-60's versatility, allowing additional folds in a second pass for large documents and newsletters.

The simplicity and value of the PF-60 make it an ideal solution for any church, school or small business that is cost conscious but requires the easy operation, versatility and dependability of a more expensive folder.

QUICK FACTS

- Up to 15,500 folded pieces per hour
- Six pre-marked fold settings
- Telescoping outfeed stacker
- Counter and batch counter
- Self-centering side guides
- Cross fold capability
